

# Edit Crop Type

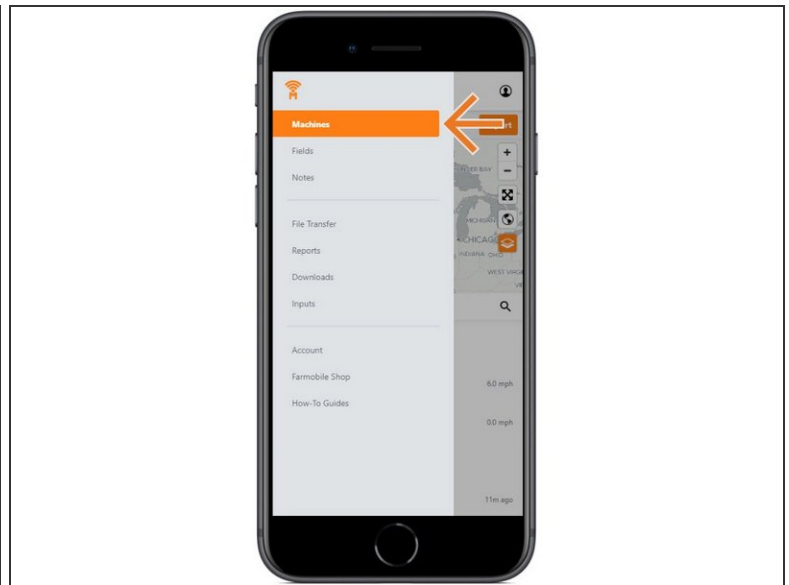

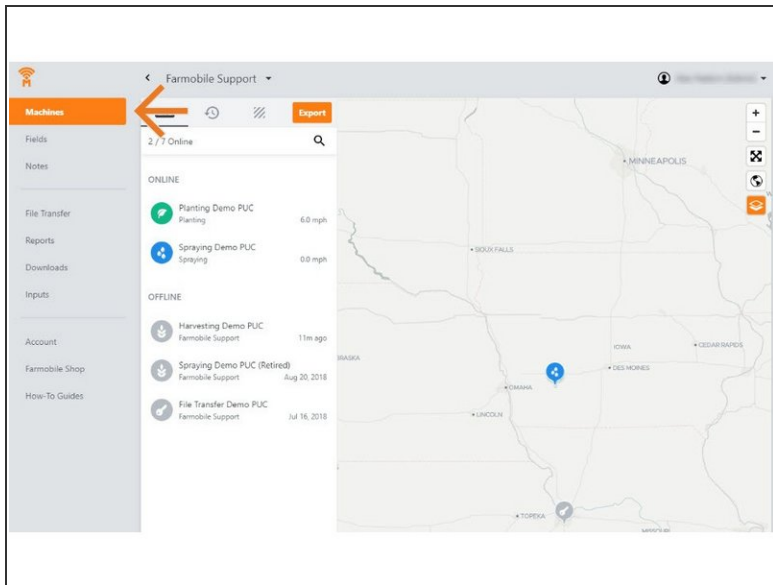

Written By: Support

The screenshot displays the Farmobile app interface. On the left is a grey sidebar with a menu: Machines (highlighted in orange), Fields, Notes, File Transfer, Data Import, Reports, Downloads, Inputs, Account, Farmobile Shop, and How-To Guides. The main area is titled "Harvesting Demo PUC" with a back arrow. It shows a machine icon, name "Harvesting Demo PUC", support info, and firmware details. Below this are controls for "LIVE" status, a refresh icon, a timeline slider set to "05:00:59 PM", and a date selector for "Jan 7, 2019". A yellow location pin icon marks "09:56 AM - Startup". The "Harvesting" dropdown menu is open, showing "Corn" selected. Other settings include "Swath Width" with a checked "Machine detected swath width" option, "PUC Centerline Offset" (set to "Right"), and "Implement Offset" (set to "Front"). The "Crop Type" dropdown is highlighted with an orange box and an arrow pointing to it from the left. At the bottom are "Save" and "Cancel" buttons. The right side of the screen shows a satellite map of a field with a green harvesting path and a yellow location pin. A speedometer at the bottom indicates "Speed - mph" with a scale from 0 to 70.

## INTRODUCTION

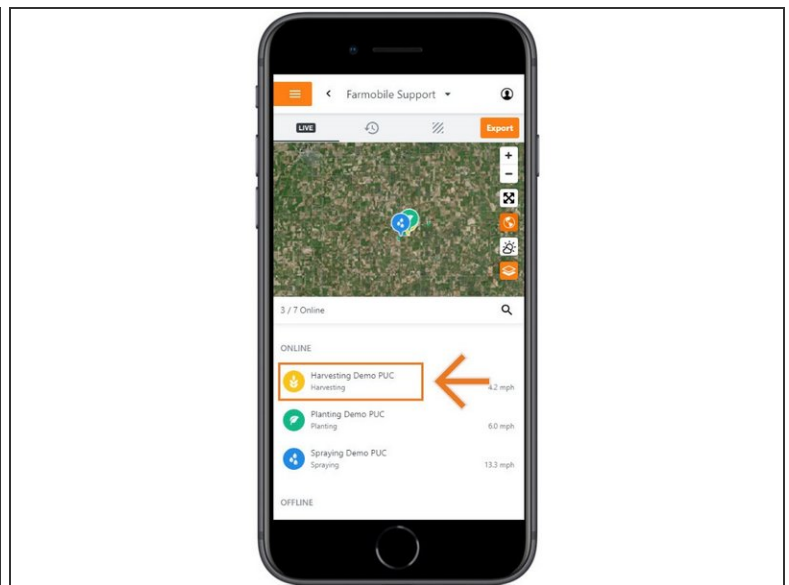

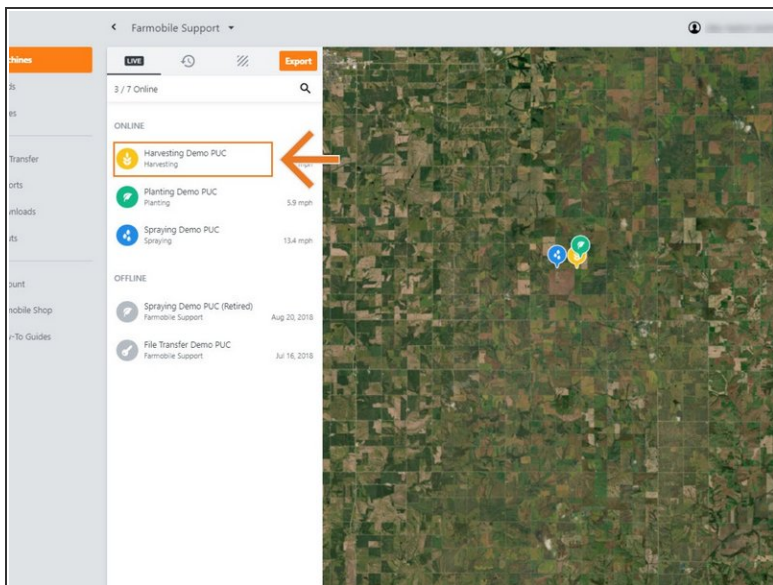

- History Machine Adjustments are only available at the Machine level.
- Crop Type Adjustments are only available for planting, forage, and harvesting activities.
- Crop Type Adjustments carry forward to the end of the year or up to the next user-entered crop type adjustment.
  - Per 'Activity' type.
  - Per Farmobile PUC™ device.
- When foraging or harvesting, you will also have a source label under the Crop Type dropdown.

## Step 1 — Select Machines from the Farmobile DataEngine<sup>SM</sup> Platform

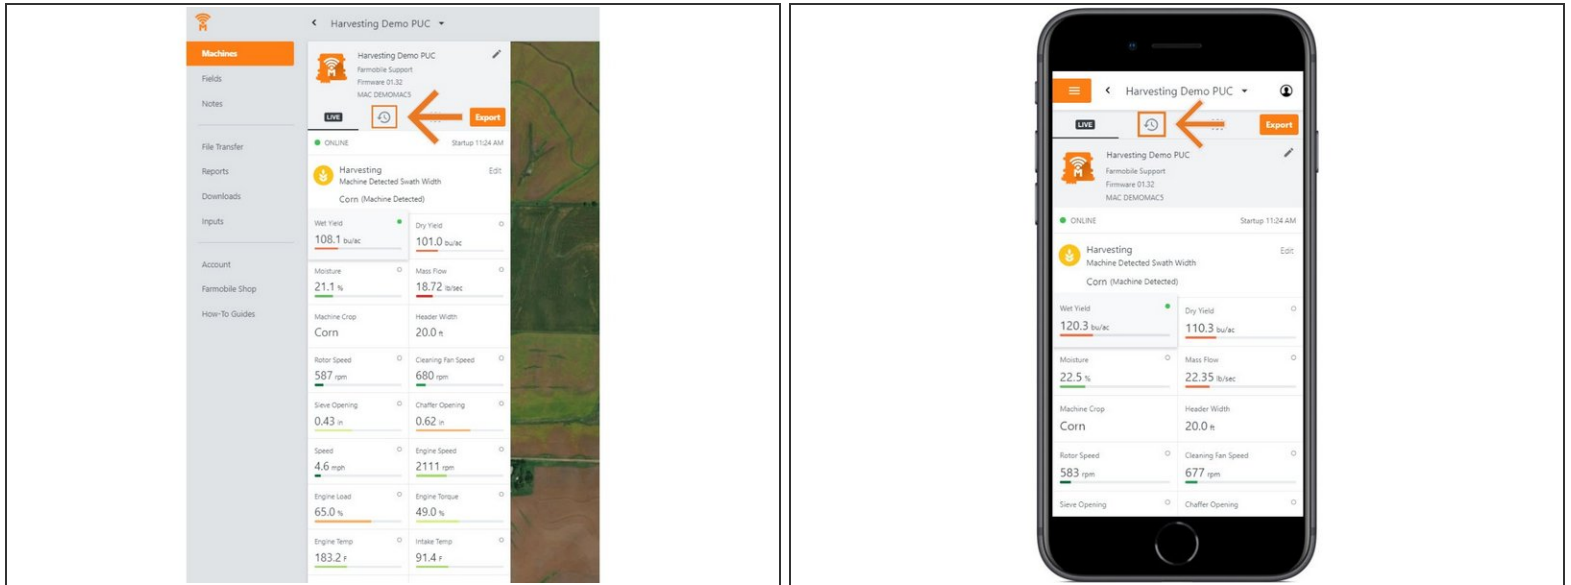

- Selecting Machines from the Farmobile DataEngine<sup>SM</sup> platform menu will open the Machines page with all of your Farmobile PUC<sup>TM</sup> device listed and displayed on the map.

## Step 2 — Select a Machine

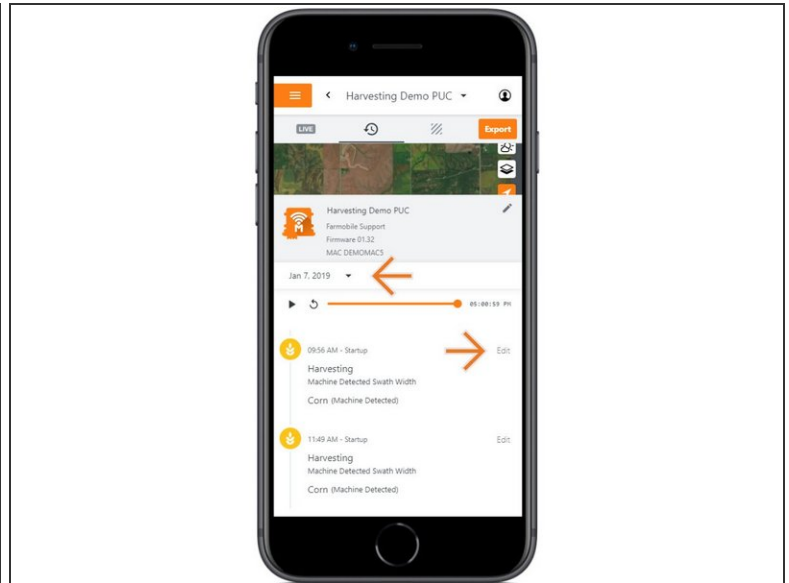

- Select a machine to open the machine details page.

## Step 3 — Select History

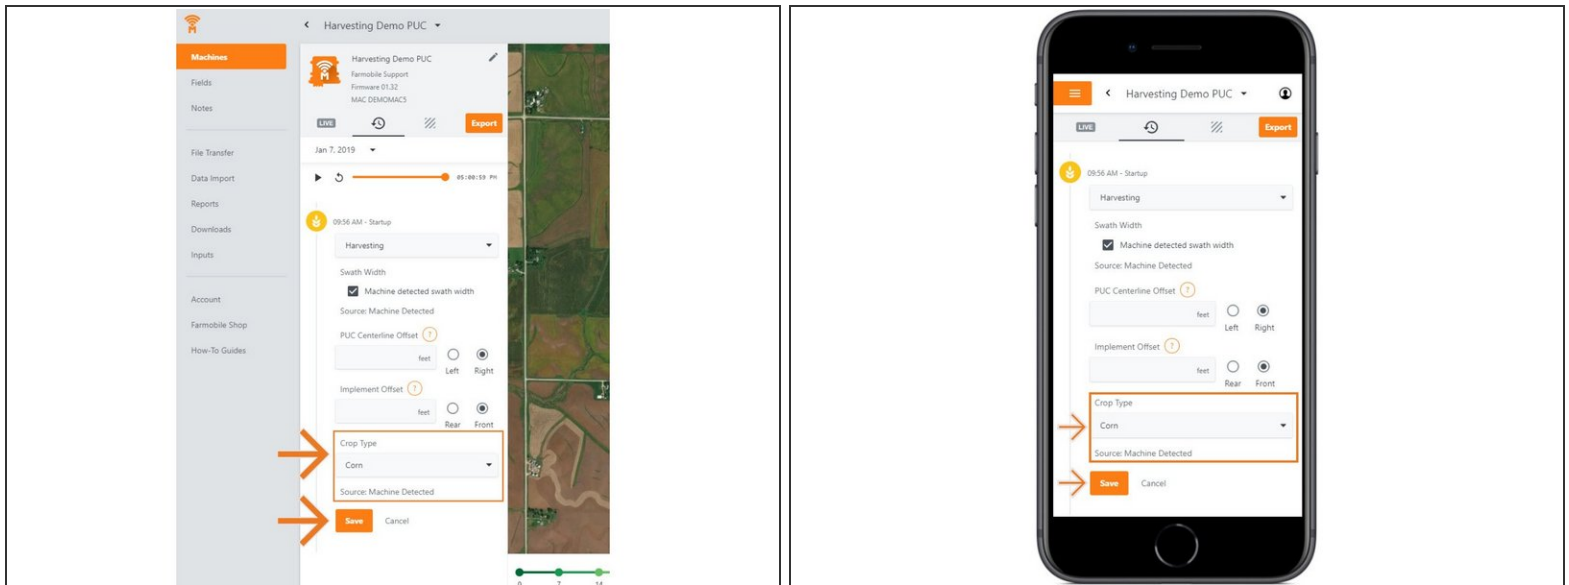

- Select the History tab to open the history page for the selected machine.
- The History page will open with the last active day selected.

## Step 4 — Select Day and Edit

- Select the calendar picker to view a different day. Days containing Machine History are highlighted black.
- Select edit to expand the adjustment options within the required session.
- The available options to adjust vary based on the current activity type.

## Step 5 — Make Crop Type Adjustment and Save

- Use the 'Crop Type' drop down menu to select a different crop type.
- For Forage and Harvest activities, the source of the crop type is provided beneath the drop down menu.
  - Machine Detected: The machine provided the crop type during the harvest activity. Changing this crop type will update the source to 'User Defined'.
  - User Defined: A user provided the crop type during the harvest activity. Changing this crop type will be another 'User Defined' crop type source.
- Select 'Save' to make the adjustment.
