## Step 1 — Identify EFRs that need Editing

- If users ever notice an incorrect crop associated with an EFR, they can make a quick adjustment by navigating to the Field's EFR under the <u>Fields</u> section of Farmobile DataEngine <sup>™</sup> platform.
- Once a user identifies an EFR that needs corrected, they can click <u>Edit</u> at the bottom of the EFR card.

#### EDIT EFR × : BOUNDARY Crop Type 143.28 ac Soybeans \$ EFRS \$ Exc . Total Metrics ncel larvest Corn Wet Weight Dry Production Net Yield Dry Yield Rate /loisture ed Acres 2 PUCs

### Step 2 — Make Adjustment

- Once the edit button is selected, users can then adjust the data to the correct crop via the drop down menu.
- Click Save

# Step 3 — Data Rerun Pending

- Once an adjustment has been made, a data rerun is set to pending. User should now see the correct crop in their EFR.
- All data reruns will occur overnight to correct the point-by-point data .

# Step 4 — Historical Adjustments

< · · ·	< · · ·
d BOUNDARY 143,28 TH3,28 T	Eta Eta Eta Eta Eta Eta Eta Eta

 Users can select the <u>Adjustments</u> button to see any historical adjustments as well as <u>Delete</u> adjustments by clicking on the <u>X</u> next to the adjustment.
