

Pre-Plant Crop/Seed Variety Adjustment

If it has already been decided which crop and/or seed variety will be planted in each field, use this guide to learn how you can set it prior to planting.

Written By: Support

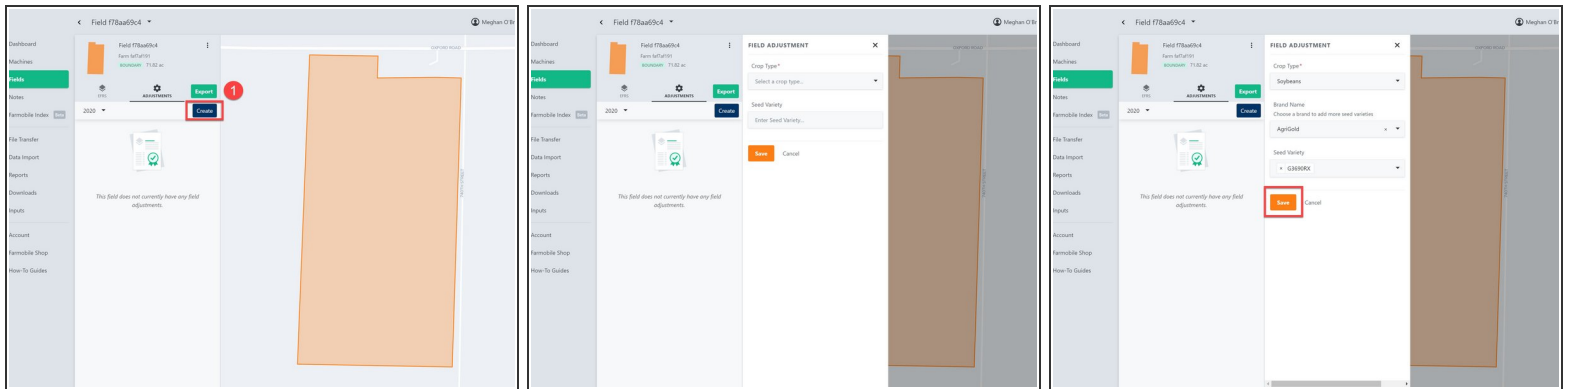

The screenshot displays the Farmobile mobile application interface. On the left is a vertical sidebar menu with options: Dashboard, Machines, Fields (highlighted in green), Notes, Farmobile Index (with a 'Beta' badge), File Transfer, Data Import, Reports, Downloads, Inputs, Account, Farmobile Shop, and How-To Guides. The main content area at the top shows 'Field f78aa69c4' with a dropdown arrow, and the user 'Meghan O'Br' is logged in. Below this, there's a section for 'Field f78aa69c4' showing 'Farm faf7af191' and 'BOUNDARY 71.82 ac'. There are icons for 'EFRS' and 'ADJUSTMENTS' (a gear icon), and an 'Export' button. A '2020' dropdown is also present. The 'FIELD ADJUSTMENT' dialog box is open, displaying the message: 'Your adjustment will be applied going forward to all planting, harvest, or forage activity within the field boundary.' with a 'Close' button. Below the message, a 'Crop & Seed' section shows 'Adjusted Crop: Soybeans', 'Adjusted Seed: G3690RX', and 'Last Modified: Mar 20, 2020'. On the right side of the screen, a map shows a field boundary in brown, with 'OXFORD ROAD' and '740TH STREET' labeled.

Step 1 — Select a Field

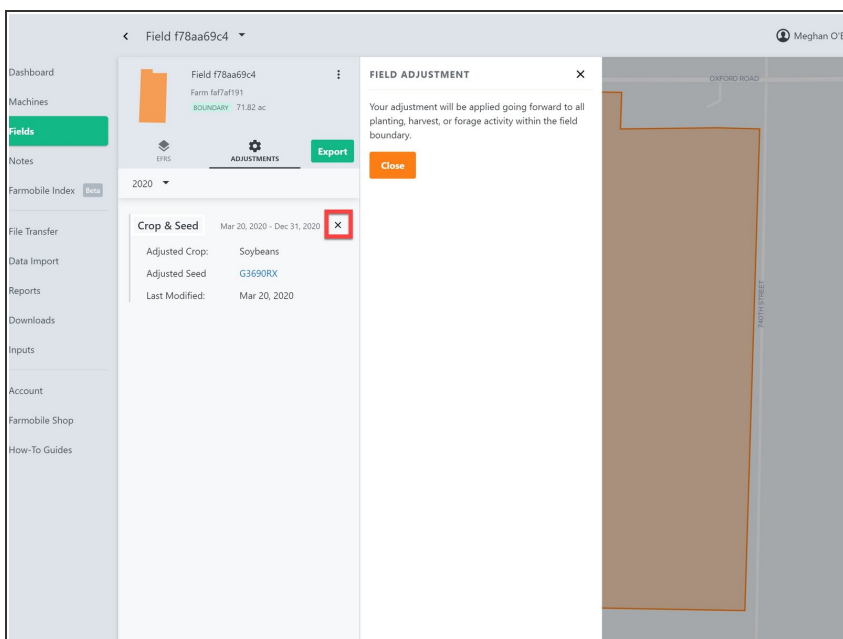

- Navigate to the fields tab
- Select the desired field
- Select the "Adjustments" tab

Step 2 — Create Adjustment

- Make sure that the "Adjustments" tab is selected
- Click the "Create" button to create an adjustment
- The Adjustment window will pop up
 - Select the crop that is to be planted in that field
 - Select the variety that is to be planted in that field
 - Click "Save"

Step 3 — Adjustment

- When the field is planted, the adjustment will automatically be tied to the EFR
- To delete the adjustment, click the "x" in the top right corner of the adjustment
