

Add Product Mixes

Here Products or Product Mixes can be created and added to your fields.

Written By: Support

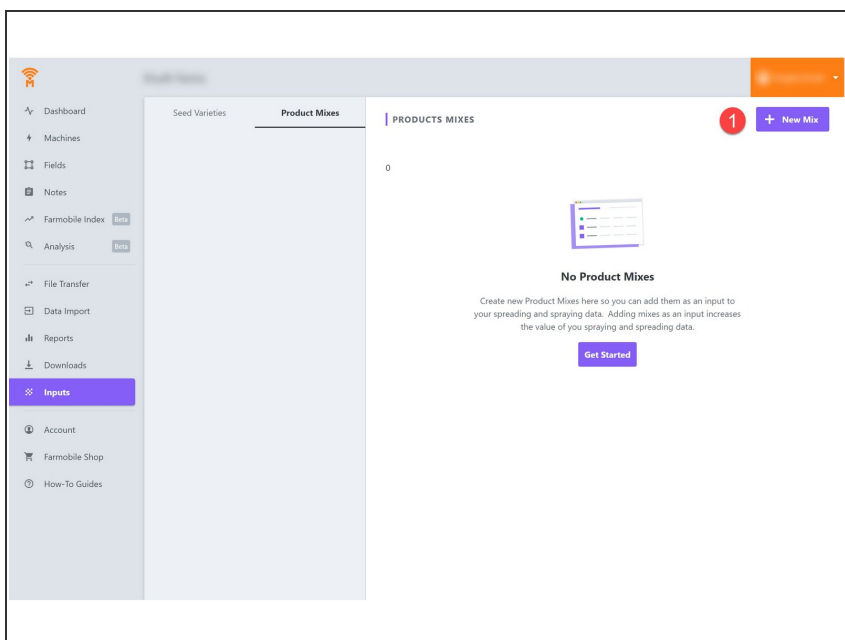

The screenshot shows the Farmobile app's main interface. On the left is a sidebar menu with icons and labels for Dashboard, Machines, Fields, Notes, Farmobile Index (Beta), Analysis (Beta), File Transfer, Data Import, Reports, Downloads, Inputs (highlighted in purple with a red circle '1'), Account, Farmobile Shop, and How-To Guides. The top header is light gray with the Farmobile logo on the left and a user profile icon on the right. The main content area is divided into two sections: 'Seed Varieties' and 'Product Mixes' (the latter is selected and has a red circle '2'). Below the 'Product Mixes' header, the text 'PRODUCTS MIXES' is followed by a large '0'. A red circle '3' points to a purple '+ New Mix' button in the top right corner. Below this, there is a placeholder image of a tablet showing a list, followed by the heading 'No Product Mixes'. A paragraph explains that creating new Product Mixes allows them to be added as inputs to spreading and spraying data, increasing its value. A purple 'Get Started' button is at the bottom of this section.

Step 1 — Select Input Tab

- Select the Inputs tab in Farmobile DataEngineSM platform
- Select the Option for "Product Mixes"

Step 2 — Select Product Mix

- Select "New Product Mix"
- A Product Mix will allow for more than one product within your field activity.

Step 3 — Assign Product to Field

- Now select what type of product is to be added to the field.

Step 4

- Create a name for the new Product Mix
- Select a product and a manufacturer that is to be added to the mix
- Specify how much of the product is to be added to the mix
- Select "Add to Mix"
- Add as many Product Mixes as needed.
