

Exporting Agronomic Field Data

This Guide will assist in exporting Agronomic Field Data from the Farmobile Electronic Field Records

Written By: Support

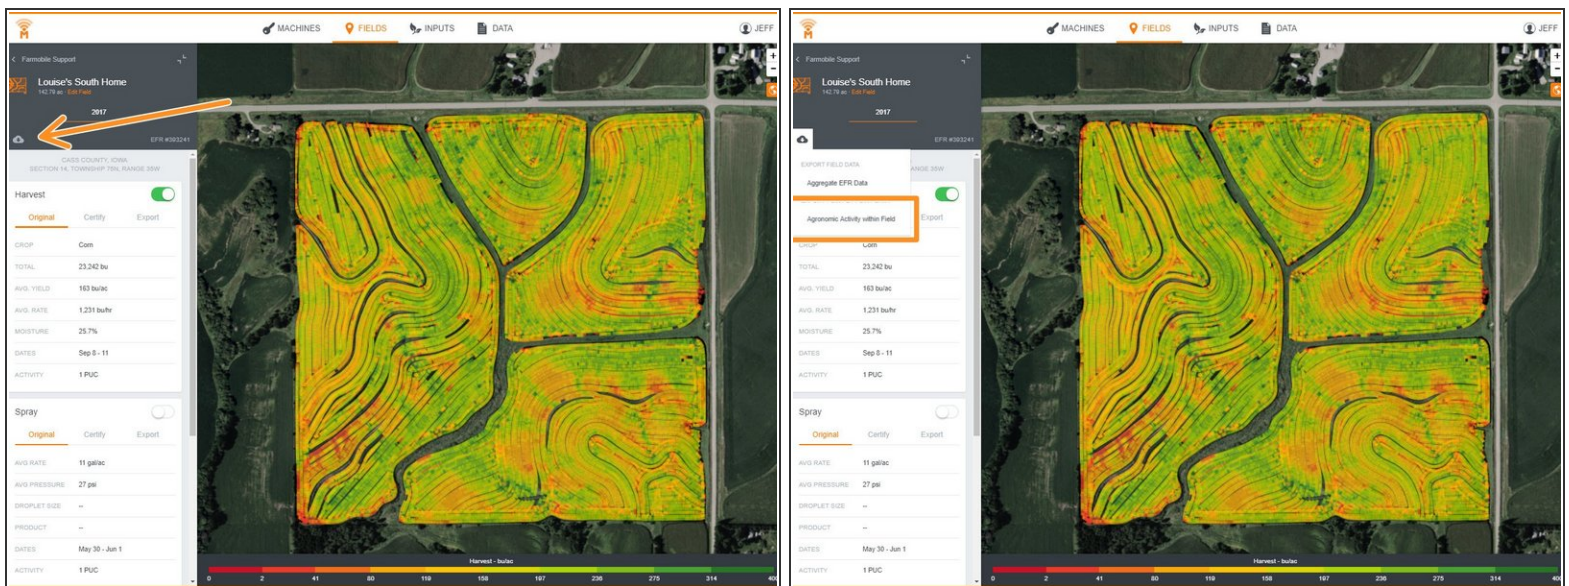

Step 1 — Select Field

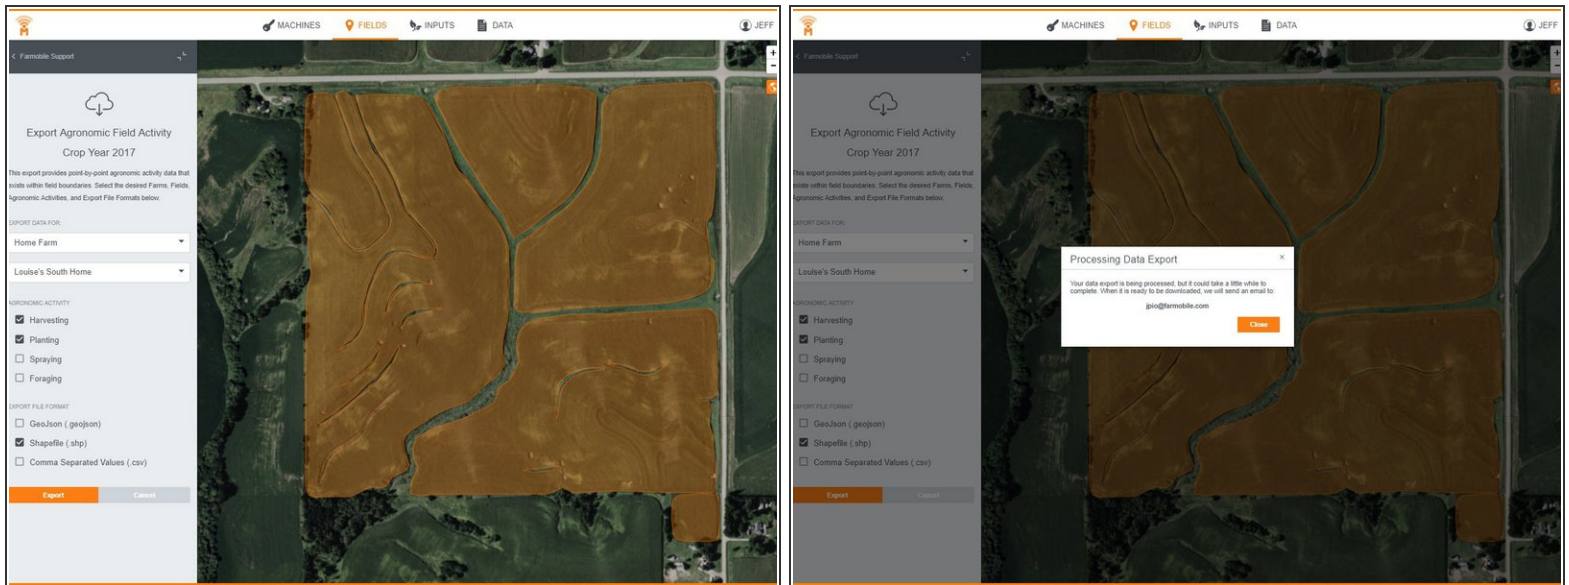

- From your EFR Tab, under the Fields tab, select the field in which you would like to export data from.

Step 2 — Select Point-By-Point Data

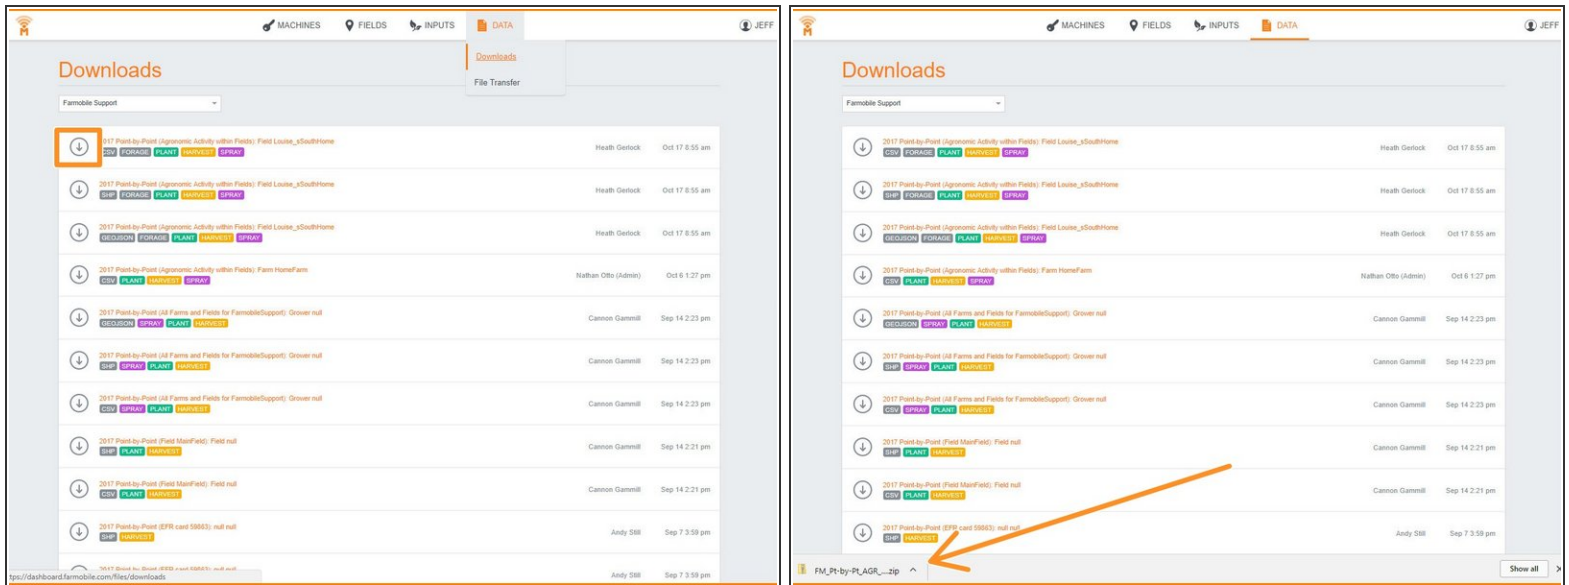

- Once the Cloud icon is selected, you will see multiple options for exporting out Data. Select "Agronomic Activity within Field".

Step 3 — Select Data needed for download

- From here, you will be able to select which Agronomic Activity you would like to download and the Export file format.

Step 4 — Download the data to your computer

- Navigate to the Downloads section under the Data icon.
- Click on the Download icon next to the Data you would like download to your computer.
- The download will automatically begin. Once completed, you will find in a .zip file in your downloads folder.
