

# Add New Input

New Input in preparation for planting season.

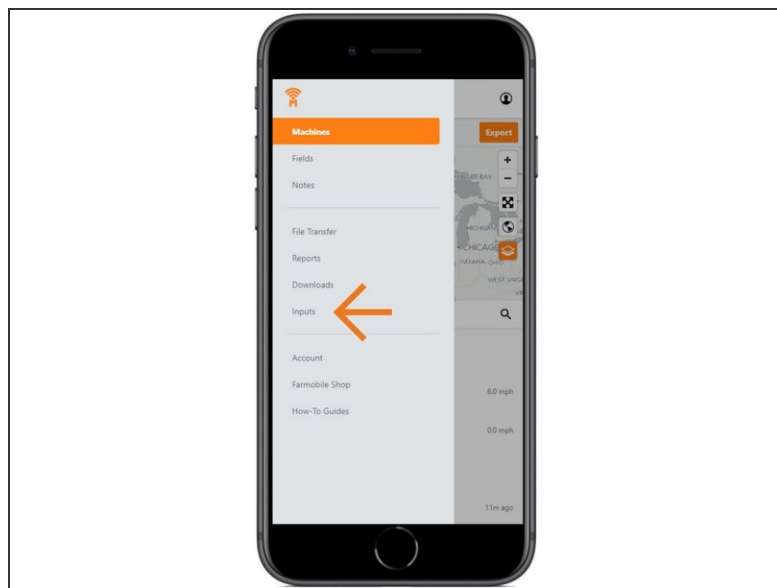

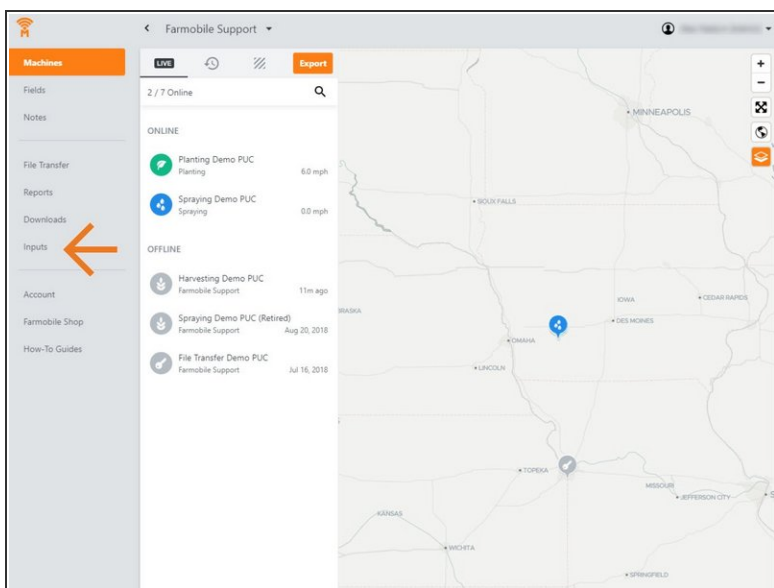

Written By: Support

The screenshot displays the Farmobile app's 'Inputs' section. On the left, a sidebar menu lists various features: Machines, Fields, Notes, File Transfer, Data Import, Reports, Downloads, Inputs (highlighted in purple), Account, Farmobile Shop, and How-To Guides. The main content area is titled 'Farmobile Support' and is divided into two columns. The left column, 'FILTER INPUTS', has two sections: 'CROP YEAR' with years 2019, 2018, 2017, and 2016, each with a green toggle switch; and 'CROP TYPES' with Barley, Corn, Canola, and Soybeans, each also with a green toggle switch. The right column, 'SEED VARIETIES', lists several seed varieties with their corresponding crop years: Lacey Barley (2019), PH-8110 Corn (2018), Dekalb 7144 Corn (2017), Pioneer 7123 Corn (2017), Pioneer 71231 Corn (2017), Pioneer xxxxx Corn (2017), Producers 6103 Corn (2017), Dekalb 6298 Corn (2016), Pioneer 45H33 Canola (2016), Pioneer P32T64PR Soybeans (2016), Producer's 2204 Soybeans (2016), and Producer's 2814 Soybeans (2016). On the far right, a 'NEW SEED VARIETY' modal is open, featuring dropdown menus for 'Crop Type' and 'Crop Year', and 'Save' and 'Cancel' buttons at the bottom.

## INTRODUCTION

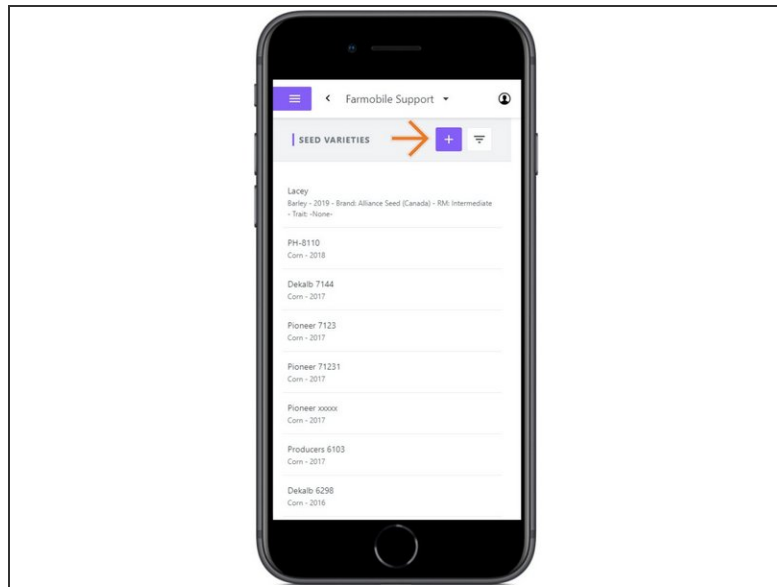

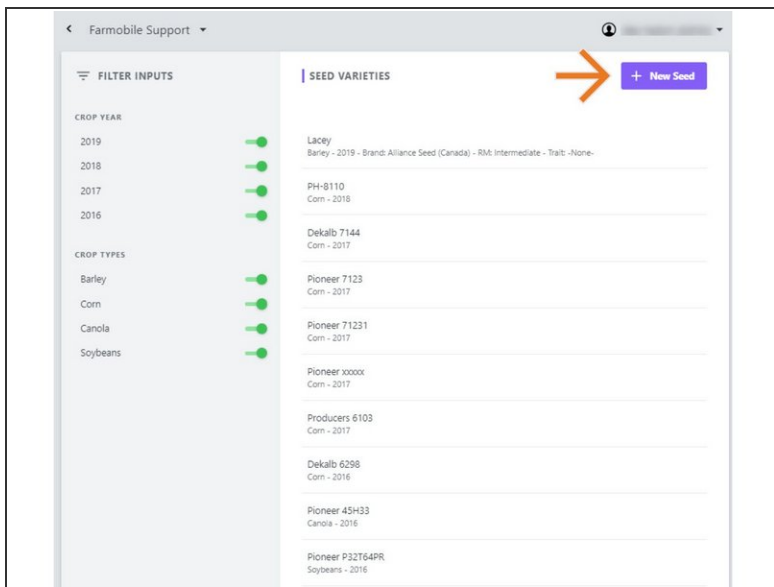

- Adding inputs is essential for data integrity and allows the user to add specific Seed Varieties to Planting Activity.
- Farmobile has integrated with Crop Data Management Systems, Inc to provide a standardized industry list of seed varieties to choose from.
- Once a Crop Type, Crop Year, and Brand Name are defined, select or enter the Seed Variety Name.

## Step 1 — Select Inputs from the Farmobile DataEngine<sup>SM</sup> Platform

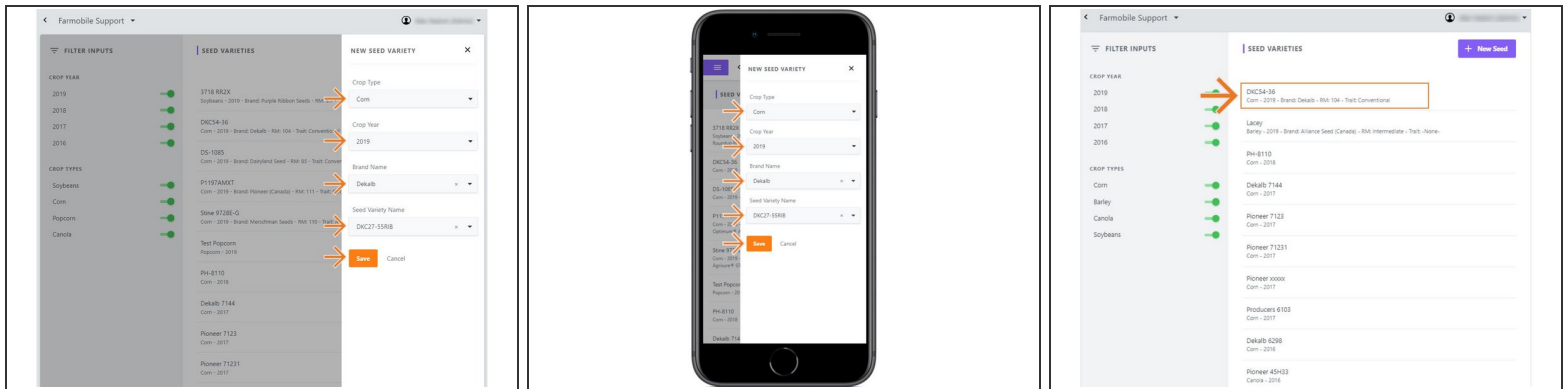

- Selecting Inputs from the Farmobile DataEngine platform menu will open the Inputs page with all your inputs listed to review.

## Step 2 — Select Add Input

- Selecting +New Seed will open the New Seed Variety form to add a new seed variety.

## Step 3 — Enter Details and Save

- Select a Crop Type in the 'Crop Type' drop down menu.
- Select a Crop Year in the 'Crop Year' drop down menu.
- Select a Brand Name in the 'Brand Name' drop down menu.
  - Note: This menu will not be available if the selected crop type is not supported by CDMS.
- Select a Seed Variety Name in the 'Seed Variety' drop down menu.
  - Note: You can type the seed variety name in the textbox if the selected crop type is not supported by CDMS.
- Select 'Save' to add the seed variety to your Input list.
