

Data + Power Cord Installation

Written By: Support

INTRODUCTION

Connect PUC to data and power source.

Step 1 — Locate Diagnostic Port

- Beneath the ride-along seat tub
- Next to the fuse panel
- Under the cup holder
- On the front of the right-hand control panel
- In plain view of mounted in the cab's paneling
- Next to the base of the drivers seat
- Near the floor on the right side of the cab

Step 2 — Plug in Cable to Diagnostic Port

- Press cable firmly into Diagnostic Port to make secure connection

Step 3 — Attach Cable to PUC

- Press cable into receiver
- Screw cable onto receiver to firmly attach to PUC
